

An Easy Guide to Our **DHIS2 Training**

DHIS2

WHAT IS DHIS2?

District Health Information System version 2 (DHIS2) is a tool used for the collection, validation, analysis, and presentation of individual, aggregate and program data tailored (but not limited) to integrated health information management activities.

DHIS2 is a free and open source software used by non-governmental and private organizations, the Federal Ministry of Health and health facilities. It is mainly used to collect routine and real time data, analyse and visualize the data and generate reports.

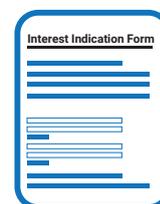

Our DHIS2 trainings are great for persons in Data Management, Public Health, and/or interested in Health Information Systems.

START LEARNING

OUR UNIQUE APPROACH TO DHIS2 TRAINING

eHealth4everyone Limited is a mission-driven organization with services, expertise and products focused on making the business of healthcare delivery work for everyone, through technology-enabled optimizations. We are experts on the use and implementation of the DHIS2 system and are also globally recognised as a DHIS2 training institute.

Different Training Levels

Our DHIS2 training is divided into Beginner and Advanced training levels to best suit your need. Our training curriculum is tailored and well-revised to effectively cover all the key features of the DHIS2 software.

Hands-on and Interactive

Both levels are hands-on and interactive, allowing our trainees to improve their expertise of the system. Our trainings are also ideal for anyone with basic computer skills. We also make room for specialised or tailored topics based on request.

Provision of Support

Lastly, we provide DHIS2 support to participants after the training. We also support organizations with DHIS2 services such as DHIS2 setup, server installation, customization, configuration, hosting and maintenance.

Contact us via

<http://ehealth4everyone.com/-consultation/>

The training will be led by Ime Asangansi (MD, PhD), a well-known digital health expert & DHIS2 consultant recognised as 1 out of the 3 DHIS2 experts in West Africa alongside his super analytical team.

WE HAVE TRAINED:

Their Testimonials

“It was fun, nice and enlightening. Initially I paid for one day but I would have regretted it”

-Idoko Joseph (eHealth Africa)

“This is a great addition to my skill set and will aid in the management and surveillance of public health programs I will get to work on.”

-Anonymous

“Got a great understanding of the National Instance. It fixed the puzzles together and brought a better clarity with respect to what I do. I also realized that DHIS2 had visualization features and organizations can incorporate it into their programs”

-Titilola Duro-Aina (UNFPA)

FREQUENTLY ASKED QUESTIONS (FAQS)

What is DHIS2?

The District Health Information Software 2 (DHIS2) is a free and open source health management data platform used by multiple organizations, including the US government, European Union (EU), and governments worldwide. For more details, refer to the top section.

Does your organization issue a receipt of payment?

Yes, we do. As soon as payment is made, we will provide you with a receipt.

Is DHIS2 a software based application? Could you please confirm if it requires a user license?

No, it is a fully free and open source software, and does not require a license.

Is the DHIS2 tool an open online platform or is it software based?

The DHIS2 is an open source tool that you can implement for your organization. When implemented for your organization it becomes your own platform that you can customize and use it as you wish.

How many days is the training?

Currently, the training lasts for a day for the beginners level and 3 days for the advanced level. However, we tailor our trainings to meet individual or organization's need.

Is the training applicable to someone without prior knowledge of the health sector?

Be well assured that our certified trainers are well equipped to instruct a participant from a learner to an expert.

Would I need to come with my own PC?

Yes please.

Asides DHIS2, do you offer training in other courses?

Yes, we conduct training in Health Information Technology Standards & Interoperability, Overview of eHealth, Data Analysis using SPSS and PowerBI, eHealth Privacy, Security & Confidentiality amongst others.

Check our page (<https://ehealth4everyone.com/products-and-services/>) for more.

Do you provide other DHIS2 services?

Yes, we do and they include DHIS2 setup, server installation, customization, configuration, hosting and maintenance.
